

COVERBAND ADHESIVE

SELF-ADHESIVE BUTYL TAPE, JOINT-COVERING GASKET FOR CEMENT AND POLYMER WATERPROOFING SYSTEMS

PROBLEM

Waterproofing perimeter expansion joints and fractioning joints

SOLUTION

COVERBAND ADHESIVE is a waterproof elastic butyl tape with a self-adhesive lower face that allows easy positioning and quick fixing. COVERBAND ADHESIVE is resistant to acids and bases and remains elastic even at low temperatures.

FIELDS OF USE

COVERBAND ADHESIVE is used to waterproof wall-floor corners of perimeter joints, fractioning joints and expansion joints in general.

METHOD OF USE

The joint-covering tape is fixed by self-adhesion.

COVERBAND ADHESIVE can be used with OSMOFLEX AB, OSMOLASTIC AB, COVERCOL AB RAPID, UNOLASTIC.

PACKAGING

Tape width 8.5 cm, in 10 m rolls.

Remove the silicone-coated film and apply the COVERBAND ADHESIVE over the joint.

Using a roller, apply enough pressure on the COVERBAND ADHESIVE strip so that it bonds perfectly to the surface.

Apply the COVERBAND ADHESIVE over the perimeter joint.
